Griesenbeck Architectural Products, Inc. sponsors the following Continuing Education course:

“Material Innovations in Commercial Daylighting”

AIA Credit: (1) Learning Unit – Health, Safety, and Welfare

Course No. MICD 200 – Provider No. 40106124

1. Identify sustainable daylighting strategies practiced regularly in commercial construction.
2. Evaluate the strengths and weaknesses of currently available materials for natural daylighting.
3. Discover the role of daylight in the health of building occupants.
4. Explore how the various daylighting strategies can aid in the successful functionality of the built environment.
